#### **Kit includes:**

- 2 x 1 L Amber glass bottles with Sodium Thiosulfite preservative
- 1 x 1 Ziplock bag – TO BE FILLED WITH ICE PRIOR TO SHIPMENT

#### **General Sampling Instructions: (Choose 1 of 2 options)**

**Reminder: READ ALL INSTRUCTIONS BEFORE PROCEEDING WITH SAMPLE COLLECTION**

**\*Sampling video available on our website at [www.nlslab.com](http://www.nlslab.com) under support material**

Do not dump/flush out any preservatives that may be present in your sampling containers. These are crucial for testing purposes. Always use caution when handling any sample container with preservatives and wash thoroughly with soap and water if preservatives would come into contact with skin.

**Option 1:** Collect water that is representative of the way you actually consume your water.

**Option 2:** Collect water that precedes any water treatment within your home. This is representative of the well water itself.

1. Collect water from selected location, avoiding new plumbing if possible.
2. Remove aeration screen from faucet if one is present.
3. Run water at maximum flow for at least 2 minutes.
4. Fill the containers without overflowing.
