Environmental Analyst/Chemist Opportunity

Northern Lake Service, Inc. Website: www.nlslab.com
400 North Lake Ave
Crandon, WI 54520

The Company: Northern Lake Service, Inc. (NLS) is a growing environmental laboratory located in Northern Wisconsin. NLS was started as a tiny office and lab room at the end of the family garage. In 1980, NLS moved into a historic old building in beautiful downtown Crandon, WI. More than three decades, three major additions, and a generation later, the modern facility is home to a company that sets the standard for environmental lab services in the Midwest. The current NLS staff consists of over thirty seasoned chemists, analysts, technicians, and support staff whose average tenure with the company is more than ten years.

The Location: Crandon, Wisconsin, is situated in the heart of the beautiful Chequamegon-Nicolet National Forest with over 1.5 million acres to explore. The forests, rivers, and lakes offer tremendous outdoor recreational opportunities throughout the seasons. In addition to fantastic recreation, Crandon is a small but strong community with a great school system, festivals, and family-friendly activities.

Job Description: As an Environmental Analyst / Chemist, you will be responsible for tasks ranging from sample extractions and digestions to calibrating, operating, and maintaining laboratory instrumentation. This includes all sample preparation, data entry, and development of technical documents.

Ideal Candidate: As an ideal candidate, you will have a bachelor's degree in chemistry, environmental science, biology, or related scientific field. An associate degree in science with laboratory related coursework will also be considered. You will have a background independently operating and maintaining laboratory equipment. You will learn to operate multiple types of instrumentation and be a mentor to other members of the team. You will have the opportunity to build a strong technical background and contribute to the development of technical documentation for the laboratory.

Requirements: A bachelor's or associate degree in a scientific discipline along with practical laboratory experience. Must be willing to work as a part of a team as well as independently at times. Must be able to operate within a Windows operating system specifically Microsoft Word and Excel programs. Must be willing to relocate for the position.

Compensation: Full-time hourly position with flexible hours. Pay will be dependent on experience. Competitive benefits package including paid time off, sick leave, 401(k), 401(k)

match, health insurance, and profit sharing. Employee stock ownership is available after one year of service.

Application Process: Submit a resume and cover letter. The hiring process may involve a combination of both phone and in-person interviews.
